#1 Facial Recognition Plugin for Milestone XProtect

Instantly identify persons of interest to notify your security team about potential threats in real time

PROBLEM

As a Milestone administrator, you know that valuable information can often go unnoticed in standard video footage. Utilizing real-time video analysis capabilities like facial recognition introduces a challenge: making these alerts and insights clear and easily accessible to security teams - both in the control room and in the field.

SOLUTION

Corsight AI's Facial Recognition Plugin integrates flawlessly with Milestone XProtect® to ensure 24/7 security monitoring. With this integration, Milestone XProtect®'s users can leverage Corsight's facial recognition capabilities directly in Milestone live video feeds.

Corsight AI's solution is capable of accurately recognizing individuals under the most challenging conditions, including face coverings, extreme angles, darkness, and harsh environments, all with unparalleled speed.

KEY BENEFITS

Camera Control
Create and analyze Milestone's cameras with extended configuration and settings abilities.

Alarms & Notifications
Customize real-time alarms to be instantly notified in Milestone XProtect®'s alarm manager when persons of interest are detected in a sensitive area.

Person List Management
Enroll persons of interest (POI) and create custom rules and alarms for different people groups.

Automatic Bookmarks
Enable efficient investigations with searchable metadata to review a person detected at a specific time and place.

Review Video Playback
Review video playback of tagged persons or unauthorized visitors automatically saved by the system.

All in One Place
Seamlessly integrate with other video services, centralizing your security operations.

HOW IT WORKS

- Contact Corsight AI to obtain software licenses.
- Connect your Milestone XProtect® VMS with the Corsight AI Plugin.
- Import persons of interest to rule-based watchlists and assign them to your cameras.
- Customize notifications and alarms for face detection events, including unauthorized visitors, VIPs, and employees.
- Receive real-time alerts directly into Milestone XProtect® VMS and initiate time-critical security responses.
